

New

AUTOMOTIVE FLOOR MOUNTED ELECTRONIC THROTTLE PEDAL 969 000 Series

Mechanical specifications:

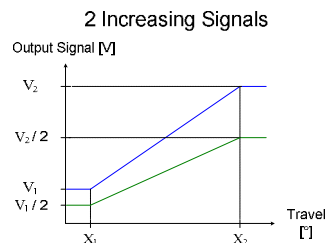

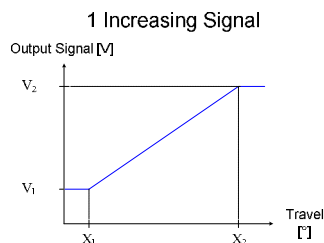

- Two “built-in” compression return springs
- Material: PA66 - GF30
- Travel angle: max 17°
- Pedal angle in rest position: 55°
- Pedal protection: IP5K0
- 6 pins connector waterproof
- Kick down option available
- Technical specification sheet and part numbers are available upon request

Electrical specifications:

All Electronic Throttle Pedals are fitted with an integrated inductive sensor. The 2 analogue output signal values are programmable and hence can be adapted to the customer’s specifications. All analogue throttle pedals are available with single or twin output signals. The second signal is always half of the first one.

This type of floor mounted pedal is mainly used in hybrid and electric driven vehicles.
